

Ashwani Mishra

Ph.no: [+91-766947406](tel:+91-766947406) || Email: mishra.ashwyni@gmail.com || Github: <https://github.com/ashwyni-mishra>

Education

- *B.Tech in Computer Science & Engineering (Cybersecurity)*

Parul Institute of Engineering & Technology – Parul University

Vadodara, Gujarat / 2025 – 2029 (Expected)

- *Deacons Foundation Higher Secondary School, Surat, Gujarat*

Highschool Certification (HSC)

Affiliation: Gujarat Board of Secondary and Higher Secondary Education Board

2024-2025

- *Deacons Foundation Higher Secondary School, Surat, Gujarat*

Senior Secondary Certification (SSC)

Affiliation: Gujarat Board of Secondary and Higher Secondary Education Board

2022-2023

Experience

Cybersecurity Intern

Shadowfox (Remote)

Feb 2026 – Mar 2026

- Performed vulnerability assessments using Nmap and Burp Suite to identify security issues in web applications.
- Used tools such as **Nmap, Burp Suite, and Wireshark** for security testing.
- Learned web application security concepts including **XSS, SQL injection, and reconnaissance techniques**.
- Assisted in analyzing vulnerabilities in web applications.

Projects

1. ReconForge – Web Vulnerability Meta Scanner

Language used: Python, Shell, Roff

GitHub: <https://github.com/ashwyni-mishra/reconForge>

- Built a Python-based meta scanner integrating **Nuclei, Nikto, and Wapiti**.
- Automated vulnerability scanning workflows using subprocess execution.
- Aggregated scanner outputs into structured vulnerability reports.
- Designed a CLI interface for automated web security testing.

2. VulnStrike – Bug Bounty Automation Framework

GitHub: <https://github.com/ashwyni-mishra/vulnstrike>

- Developed a modular Python-based framework for automating bug bounty workflows.
- Implemented reconnaissance, attack surface mapping, and vulnerability detection.
- Integrated tools such as subfinder, httpx, ffuf, nmap, and nuclei.
- Built asynchronous scanning modules and CVE intelligence using NVD API
- Designed plugin-based architecture and PDF and markdown report generation.

Technical Skills

1. **Programming:** *C, C++, Java, Python, HTML, CSS, JavaScript, Bash*
2. **Cybersecurity:** Nmap, Burp Suite, Wireshark
3. **Developer Tools:** Git, VS Code, PyCharm, IntelliJ
4. **Concepts:** Networking, Web Security, Vulnerability Assessment
5. **Security Concepts:** OWASP Top 10, Vulnerability Assessment, Reconnaissance, Web Exploitation
6. **Platforms:** Linux, Kali Linux

Areas of Interest

- Web Application Security
- Vulnerability Research
- Backend Development
- Security Automation
- Penetration Testing
